

Franklin Township Community School Corporation Annual Asbestos Notification 2021

Parent/Guardian of FTCSC Students:

Any building constructed after the late 1950's but before the late 1970's most likely has construction materials that contain asbestos. Asbestos that is intact and undisturbed typically does not pose a health risk. Damage or deteriorated asbestos can release fibers, and if the fibers are inhaled, they can lead to various health problems such as cancer or asbestosis.

Franklin Township Community Schools complies with all federal and state regulations and timelines for inspecting our facilities to ascertain if the asbestos-containing materials or those assumed to contain asbestos have changed. The last state mandated inspection was conducted on 9-26-2021, and all materials were found to be in good condition. Our next inspection will be conducted on or before 3-26-2022.

These FTCSC facilities contain asbestos that is normally found in floor tile, floor tile mastic and pipe insulation: Acton Elementary, Arlington Elementary, Bunker Hill Elementary, Franklin Township Learning Center, the E.B. Carver Education and Technology Center and Franklin Central High School.

The following buildings do not contain asbestos: Adams Elementary, Edgewood Intermediate, South Creek Elementary, Thompson Crossing Elementary, Kitley Intermediate, Franklin Central Junior High School, Franklin Township Freshman Academy, Franklin Township Athletic Stadium, and the Wanamaker Early Learning Center.

Franklin Township Schools meets or exceeds federal and state guidelines for asbestos inspection, containment and reporting. FTCSC will continue to monitor and maintain all known or suspected asbestos-containing materials in our facilities.

Federal and state statutes require that an asbestos management plan be on file and implemented since July of 1989. FTCSC has maintained a management plan since that time. FTCSC will follow all federal, state and local regulations related to controlling asbestos. You are welcome to review a copy of the asbestos management plan which is kept on file at the FTCSC Maintenance Facility, 8602 Indian Creek Road, Indianapolis, IN 46259. To schedule a time to do so, please call Maintenance at 862-2411.
